

February 25th, 2015

Dear Valued Customer:

After much consideration, No Bolt has decided its future lies solely with customer engineered solutions and, therefore, will cease the manufacture and sale of scaffolding including:

- 4700 Series Scaffolding
- 2700 Series Scaffolding
- Rapid Scaff and
- Stair Access Tower range
- and components or replacement parts

on March 31, 2015.

In the circumstances, telephone and email support after this date will cease, although, for the time being, some assistance regarding component lists, instructions for use, maintenance and storage along with current compliance information will be available from: www.scaffolding.nobolt.com.au However, in particular, you will need to make your own arrangements to ensure you remain up to date with any future changes as regards compliance.

If still using No Bolt scaffolding, you can order parts from No Bolt on (03) 8710 3900 or email: sales@nobolt.com.au until **March 31** but please make sure you do so before manufacturing ends.

The No Bolt (aluminium) tower frame scaffold was first design registered with the Department of Labour and Industry in 1975 and it is with some sadness we have made this decision, but recent and significant inroads by low cost offshore manufactured products has made it inevitable.

Despite withdrawing from scaffolding, No Bolt will continue operating within the height safety industry with a marked expansion in its capacity to provide more specialised engineered solutions for specific access problems where standardised mass produced scaffolding products fall well short of the mark.

Thank you for your support over the years and good luck in your own endeavours.

Yours sincerely

Will Collie

Managing Director
