

June 3, 2015

Dear Valued Customer,

I refer to my letter of 25 February 2015 which advised that No Bolt had decided to cease the manufacture and sale of scaffolding as from 31 March 2015.

After completing some orders placed by customers keen to "top up" their equipment, the decision was implemented and No Bolt is now concentrating on customer engineered solutions particularly in resource (despite the downturn, worker safety is still paramount) and aviation industries.

However, partly as a result of continuing scaffold enquiries and so as to offer past customers access to future support (and contemporaneously with a timely approach from Star Aluminium of 17 Citrus Street, BRAESIDE VIC 3195), No Bolt has agreed to transfer to Star Aluminium the hardware necessary to build scaffolding compatible with the No Bolt 4700 series (including jigs and exclusive access to various extrusion dies).

Some of you may be aware that Star Aluminium was founded in the 1990's by a former employee of No Bolt so there certainly is longstanding experience with the No Bolt product. Obviously, we cannot and do not take any responsibility for scaffolding manufactured or sold by Star Aluminium (whether compatible with No Bolt scaffolding or otherwise) but we have no reason to believe that such products will not be made to an appropriate standard.

The transfer of the hardware and relevant intellectual property to Star Aluminium means that no other person or company can manufacture scaffolding as compatible with the No Bolt 4700 series in that the same jigs and dies are to be used.

I trust you continue to utilize your No Bolt scaffolding and supplement it as required with purchases from Star Aluminium who I am sure will be ready to meet your needs.

Yours sincerely

Will Collie
